## ACADEMIC PROJECTS

**To-Do List Website** | *HTML, CSS, PHP, MySQL, JavaScript* | [GitHub Link](#)

- This is a To-Do List Application built using HTML, CSS, JavaScript, PHP, and MySQL. The application allows users to create, manage, and organize their tasks efficiently. It supports essential features such as adding tasks, editing them, marking them as complete, and deleting tasks. Tasks are stored in a MySQL database.

**UpTrend(Fashion Shopping Mobile Application)**| *Figma, Flutter, Dart, Android Studio* | [Prototype Link](#)

- The Figma design features a mobile fashion app where users can browse items in homepage, favorite products, and add them to a cart. Profile management, VR try on screen and easy checkout from the cart are also included, providing a smooth and engaging shopping experience.
- This Flutter app is a fashion shopping platform with the features such as exploring clothes and accessories, add to favorites, cart checkouts, profile management and searching the product in the application. These features create a seamless and engaging shopping experience.

**Save Plant** | *HTML, CSS* | [GitHub Link](#)

- "Save Plant" is a user-friendly web development project that showcases a responsive landing page designed for an online plant shop. The landing page includes sections for purchasing plants, plant care tips, exploring a selection of plants, and an informative "About Us" section.

**ART GUARDIAN (Artwork Copyright Website)** | *HTML, CSS, MySQL, PHP* | [GitHub Link](#) • A website that helps in the copyrighting of artworks used by various individuals involved in the art and creative industries, those seeking copyright protection for their creative works. The artist or creator seeking to apply for copyright for their artworks. The artist fills out the copyright application form, including details such as the title of the artwork, a description, and uploads a digital copy of the artwork. Upon approval, the website generates an official copyright certificate for the artwork and notifies the artist that the artwork is now officially copyrighted. The artist has successfully applied for copyright protection for their artwork, and an official copyright certificate has been issued.

**HOME AUTOMATION (Voice Controlled home automation)**| *Arduino*

- Voice-controlled home automation using Arduino, HC05 Bluetooth involves integrating Arduino boards with voice recognition module. These modules interpret voice commands and trigger corresponding actions through relays or actuators connected to household devices like lights, fans, or appliances. Arduino code processes voice input, mapping it to predefined actions. Commands can include turning devices on/off, adjusting settings, or activating specific routines.

## TECHNICAL SKILLS

**Languages:**HTML, CSS, , Javascript,

**Database:** MySQL

**Developer Tools:** Git, VS-Code.

**Design Tools:** Adobe Photoshop, Canva, Figma.

**Miscellaneous:** Data Structures, Algorithm , Problem Solving.

## ACHIEVEMENTS AND CERTIFICATES

Certificate of Accomplishment for **Software Engineer** by **HackerRank**. | [\*\*Link\*\*](#) Certificate of Appreciation for **100 Designs** by **Canva** .

Certificate of Appreciation for **3<sup>rd</sup> Position** in **Ideathon** by StartUp Club SSIPMT Certificate of Appreciation for **3<sup>rd</sup> Position** in Project Development Competition by **AI CTE IDEA LAB SSIPMT**.

Certificate of Appreciation for **1<sup>st</sup> Position** in **10<sup>th</sup> Board Exam**.

## LANGUAGES

**English**
